~ EUROPE DAY 2014 ~

A “PROPAGANDA” POSTER EXHIBITION FOR THE EUROPEAN ELECTIONS!

► On the 21st of May 2014, we celebrated Europe Day. During the school-year, I took part in a “propaganda posters” project. I took some historic propaganda poster from the 20th century, and created parodies with each of them. Because of the increasing abstention rate at the European Parliament Elections, we wanted to get the public’s attention, to raise its awareness, and to urge it to vote at the end of the month. Voting is a right, but it’s necessary for democracy, because the members of the Parliament will vote laws that will have an impact on every citizen’s life.

► I really enjoyed using computer graphics software to realise the posters, and it was really fun to organize a real exhibition and explain my work to the other students. The posters were parodies of old propaganda posters, but there was also a propaganda message behind them.

WHO'S ABSENT ... FOR THE EUROPEAN ELECTIONS?!

~ JEAN BAPTISTE MASSILLON ORATORY PRIZE 2015 ~
THE ORGANISATION OF A PRESTIGIOUS EVENT BY THREE DETERMINED STUDENTS !

THE JURY

► For the second time in Massillon, an oratory prize was organised. But this time, two friends of mine (Jean and Lisa) and I were the one to set up the JBM Oratory Prize.

From the choice of the speech topic to the creation of a website, and from the jury to the filming of the talks, we set up the entire competition to create a whole new show, with the great help of the educational team of our high-school.

► It was such an exciting experience to work as a team on a great project like this one. We really enjoyed completing the administrative tasks and building a website. We managed to deal with the different issues, but in the end, the prize of the 12th of May 2015 was a real success.

DISCOVER AN INVISIBLE MATTER FOR THE INTERNATIONAL YEAR OF LIGHT!

► For the International Year of Light, proposed by UNESCO, Romain and I chose to make a video about the dark matter. We wanted to show that what we see of the universe isn't "reality". In order to do so, we have researched this very interesting subject and published a video on the "Bright Sparks" blog.

► We managed to realise a video like the trailer of a scientific documentary, in order to give it a comic aspect. We acquired a lot of knowledge in physics and working together was a great experience.

~ POLITICAL DEBATE AT EUROPAVOX 2015 ~

WHAT'S YOUR EU-TOPIA ? TEENAGERS ARGUE WITH A POLITICIAN

► On the 25th of May 2015, I was invited with Jean and Lisa to take part in a debate with Miss Karine Gloanec Maurin, Vice-President of the Regional Council of the “Centre” region, presided by Nora Hamadi, a journalist at the “Public Sénat” television channel.

MUST SEE!

► The subject of the debate was “Europe and utopias”, and we had to give an example of an ideal European Union. I asked the politician about the difficult access of culture by youth in the European Union, by using the example of the European Capitals of Culture. This debate was a real opportunity and great experience that I’d never had before. Also, we were invited to the VIP dining room and to a splendid concert.
